True Colors Personality Assessment

A personality test is completed to yield a description of an individual's distinct personality traits. In most instances, your personality will influence relationships with your family, friends, and classmates and contribute to your health and well-being. Teachers can administer a personality test in class to help your children discover their strengths and developmental needs. The driving force behind administering a personality test is to open up lines of communication and bring students together to have a higher appreciation for one another. A personality test can provide guidance to teachers of what teaching strategies will be the most effective for their students.

“Successful people know who they are and what their True Colors are ... when you know what your core values and needs are and feel good about them, you can perform at your highest potential in every area of life. And when you share a working, mutual understanding of others' core values and needs, you have the basis to communicate, motivate, and achieve common goals with utmost dignity, efficacy, and mutual respect”.
